Dear Reader

Warm Greetings for the New Year!

The rapid changes and increased complexity of today's world present new challenges and put new demands on our education system. Technology has changed the face of education by evolving newer concepts and techniques. The latest trend in education system is Online Education provided by many universities.

In the recent years, several top universities in the world are offering Online Master's Degree programme across various disciplines. These programmes provide flexibility and convenience for students who cannot attend on campus classes or prefer remote learning. In our country, 57 UGC approved universities offer online degree. Recently, Mumbai University received UGC nod for online degrees. Starting with an MA in Sociology in the coming academic session, it will gradually increase the number of online courses. At a recent management council meeting, Mumbai University's institute of Distance and Open Learning (IDOL) was designated as Centre for Distance and Online Education (CDOE) as per regulations.

Another noteworthy change with reference to institutions of higher education is the grading system for Indian Higher Education Institutes by National Assessment and Accreditation Council (NAAC) has been abolished. Instead of that, it has opted for binary accreditation process, tagging universities and colleges as either accredited or still to be accredited. NAAC has developed new structure to eliminate "unhealthy practices" and a race that pushes institutes to hire consultants.

In school education, as per the recent GR received from the School Education Department, Govt. of Maharashtra, the detention policy in Grade V and VIII is applicable from this academic year 2023-24. The school will have in-house question paper this year and corrections will be done by in-house teachers. The failures in Grade V & VIII will have remedial classes in the month of April after the final exams are over and the record of the same has to be maintained. The re-exam with the failures will be conducted in June & three days before the school reopens, the results will be announced. If they still fail, they will be detained in the same class.

The month of January marked the 162nd birth anniversary of Swami Vivekananda. This day is observed as National Youth Day in his memory. Born as Narendra Nath Dutta in 1863, the young sanyasi was instrumental in spreading the values of Vedanta and Yoga to

Dr. Sunanda Kar, Editor

the world. The month of January also celebrated 127th birth anniversary of Netaji Subhas Chandra Bose on 23rd January as 'Parakram Diwas'. The theme for Parakram Diwas 2024 is "Netaji: the inspiration for a New India". The theme reflects the government of India's vision of a New India, a country that is prosperous, strong and democratic. Netaji's ideals of patriotism, courage and determination are essential to achieving this vision.

Back home at RSET Campus, past few months witnessed many prestigious awards and accolades conferred on our institutions, for attaining excellence in the field of education. Many faculty members presented research papers at the conferences and their papers have been published in reputed journals. Mainadevi Bajaj International School ranked 1st in Zone D (Jogeshwari to Borivali) and 3rd in Mumbai with Cambridge curriculum as per Times School Survey 2023. Ms. Florina Fernandes and Dr. Padmaja Kutty Principals of Ramniwas English High School and Mainadevi Bajaj International School respectively, along with Office-Bearers of RSET- Shri Lalit S. Saraf and Shri Vinod L. Dalmia were awarded the 'Times Education Icon Award' by the Times of India at the hands of Tennis Legend Padmashree Leander Paes at a grand function held at St. Regis on 19th November, 2023. Kudilal Govindram Seksaria English School also ranked for the 5th time, 8th among schools with State Board Curriculum in Mumbai as per Times School Survey 2023.

Our institutions did not lag behind in the area of various games and sports. Annual Sports Day of all institutions were celebrated in the month of December in a grand manner in Goregaon Sports Club and in Pravinchandra D. Shah Sports Academy ground. Girls' Table Tennis Team of Durgadevi Saraf Junior College secured the First Place in Table Tennis Competition held on 17th October, 2023 at Goregaon Sports Club at Taluka level and were selected for District level. Akshaj Pillay of RBHS grade 10 won a gold medal at the DSO State level Judo tournament held at Sangli. Aanika Bhatia of RBHS participated in the 43rd Prabodhan Krida Mahotsav 2023 at the Ozone Club, along with winning gold in freestyle, butterfly, backstroke and breast stroke, she also won the individual championship trophy and the overall best swimmer trophy in the girls group.

All the schools and colleges celebrated Annual Day in PDSA ground from 19th January, 2024 to 28th January, 2024. Eminent personalities were invited to grace the Annual Day celebrations as the Chief Guests. Members of the Donor families of each institution were invited as the Guests of Honour. We are marching onwards to become an academic centre committed to excellence and learning, dedicated to create a community of well educated, globally exposed citizens. In our campus, education is fun, teachers are friendly and at the same time they maintain discipline with the learners. It is our long and continuous journey to attain excellence in the educational endeavours.

Growel Science Lab
At KGSS

Dear Reader,

Greetings for the New Year!

It gives me immense pleasure to note that Growel Science Laboratory regularly provides a platform to the students of Kudilal Govindram Seksaria Sarvodaya School (KGSS) and Kudilal Govindram Seksaria English School (KGES) for their science practicals.

The Lab is provided with the required equipment to conduct practicals in Physics, Chemistry and Biology, has a sufficient flow of water and a first-aid kit. Safety is paramount, therefore storing acids and other reactive chemicals in separate locked cupboards is an essential precautionary measure. During practical sessions, students are given separate workstations. Students also receive dedicated support from a lab assistant, who ensures that the lab is fully equipped and prepared in advance.

The practical experiments conducted by the students are fascinating. Some of the experiments that stood out include the reaction between alum and water (Standard V), observing light passing through a pinhole camera (Standard VI), examining slides under a microscope (Standard VII), exploring magnetic and non-magnetic objects using a magnet (Standard VIII), and the dissection of a hibiscus flower (Standard IX). Additionally, students learned about the food chain, which provided valuable insights into the transfer of energy and nutrients within an ecosystem. These hands-on experiences are very beneficial for the students' understanding and engagement in science.

I am delighted to hear about the active participation of students from both KGSS & KGES in the Science Exhibition organized by 'P' ward each year. This year at the Science Elocution competition of 'P' ward, students from KGSS secured the 1st prize in both the Junior and Senior groups, showcasing their impressive skills and knowledge. Furthermore, in the Quiz Competition, KGSS students bagged the 2nd prize in both Senior and Junior groups, demonstrating their excellence across various academic disciplines.

I extend my best wishes for continued success to everyone associated with the Rajasthani Sammelan Education Trust.

The year was special for RSET as it celebrated 75 years in the field of service to humanity and the community. With the grandeur of the event, the annual days of every institution shone brighter.

The Annual days at RBHS were held on two days to accommodate the growing parent community. 'Earth Song' was an apt title for the annual day especially when everyone around is concerned about the climatic situation. The programme was divided into three parts - In the Beginning, Man Becomes Selfish, There is an Answer. The performances took us through the journey of the earth where eons ago the forces of nature lived in harmony and then man started exploiting it for his convenience. The story of the earth was well narrated through the eyes of Mother Ganga and humans. The performances beautifully showed the forces of nature working in harmony to benefit man and all life form. The pre-primary students with their vibrant costumes beautifully danced to bring out the power of Air, Water and Fire on Earth.

The first ever Mute n Mime show written and directed by the students of Grade 8 showed the activities that led to the Uttarakhand deluge and how man repented for his misdeeds. The scenes of the mountain land on the screen along with the soul stirring created the right mood for awareness. Michael Jackson's Earth Song was a beautifully dance rendition of the destruction we see around. The primary students brought Shel Silverstein's poem 'The Giving Tree' alive with their dramatization of how man's greed will not outdo the caring and giving nature of trees. The dance ballet depicting the Chipko Movement – its origin and its might even today was well narrated through dance. The very recent protest against the cutting of trees at Aarey was also a part of the dance ballet. The choir beautifully belted out that we can count on trees to pull us out of this mess.

The fashion show for Sustainability was mind blowing as it showcased the immense talent of our grade 9 students. The theme of the show

was reuse and recycle. The models displayed how old and worn out silk saris can be used as dhotis or as a stole by men. Table cloths were used to create a jazzy party dress, while old ties were sewn to create a pretty short skirt. It was amazing to see the talent of our students to create fashion out of throwaway articles. A worn out shirt was reinvented by painting a masterpiece to hide the stains.

The grade 10 students with their energy brought in a fitting finale to the programme. Besides the energetic and vibrant dances, students brought out their talents in creative ways. What was commendable too was the students who were tirelessly working backstage. There were students in the IT team who were responsible for the creative display of scenes on the background which beautifully resonated the mood and colour of the performance. All the props displayed the artistic talent of the art team. While the school speaks about 100% participation, it believes in giving everyone a

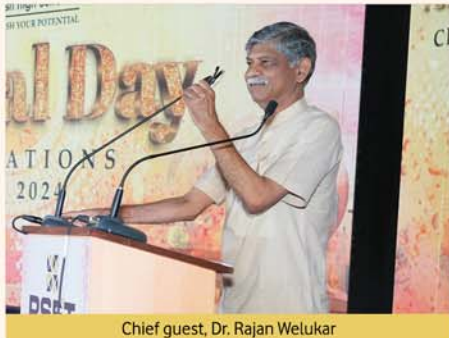

change to not only showcase their strengths but also to try out new opportunities every year. The class is responsible for the performance and everyone gets a chance to take centre stage.

The guests for the events – Mr. Vinodkumar Bajaj, Mr. Rajkamal Bajaj, Dr. Rajan Welukar and Mr. Dilip Piramal along with our Trustees added to the grandeur of the evening. Dr. Rajan is the Vice Chancellor of Atlas Skilltech University and inspired the audience with his views on how

education and schools have evolved. He spoke about the country was making progress and the importance of schools reinventing themselves to ensure their students are ready for the world outside. Mr. Piramal, Chairman of VIP Industries, spoke about the changes we were lucky to witness in our country at the time and how we can take advantage of the importance that India was gaining globally. Both the Chief Guests complimented the RSET on the service to the community through education mainly and other

areas too. Our main donors Mr. Vinodkumar Bajaj and Mr. Rajkamal Bajaj complimented the students and staff for the great performances and the prize winners for their achievements.

While the parents were left enraptured by the energy, vibrancy and the colourful display of talent, the performances did drive home the message of caring for the planet and their future.

On the auspicious day, Wednesday, 24 January 2024, the milieu at MBIS resonated with the creation of indelible memories as the students showcased an extraordinary performance during the Annual Day celebration. The meticulously orchestrated program seamlessly unfolded across various sections, eloquently portraying the lives of unsung heroes of India and their tireless endeavours in paving the way for a brighter tomorrow.

The Choir, 'Purpose of Life' laid a good foundation for the entire programme. The thematic tapestry of the Annual Day 2024 skit was intricately woven around the motif of 'Sparkle, Shine, and Smile', a celebration of the inner radiance inherent in each individual. The spectacle unfolded as the students from the Pre-Primary and Primary sections brought to life Sparkle, Shine, and Smile – three enchanting fairies imparting lessons on emotional resilience

by emphasizing that 'Happiness' is a conscious choice. Through captivating renditions of classic fairy tales such as Cinderella, Snow White, Hansel and Gretel, the trio exemplified that despite facing adversity, one can triumph by believing in oneself, spreading sparkle, emanating shine, and bestowing infectious smiles in every circumstance.

The proficiency exhibited by the characters, meticulously trained to perfection, coupled with the sheer joy emanating from the dancers as they poured their hearts into their performances, underscored the dedication and hard work of every teacher in both departments. The enchanting transformation of the bare stage into a mesmerizing fairyland, adorned with beautifully crafted hand-made props and illuminated by LED lighting, elevated the entire act, reinforcing the notion that diligent and earnest effort is the bedrock of success.

A crowning moment was the impeccably

delivered report by our esteemed Principal, Dr. Padmajaa S Kutty. Her eloquence was a breath of fresh air, adding finesse to the overall presentation.

This was followed by the much awaited Prize Distribution ceremony where the student achievers were felicitated in different categories by the Chief Guest and Guest of Honour, accompanied by Shri Ashok M. Students of Grades 6 to AS levels captivated the audience with their enchanting presentations- *Superhero Dance Performance (Grades 7-AS levels):*

The festivities commenced with an innovative superhero dance performance, serving as the captivating opening act that introduced the overarching theme to the audience.

- *Mr. Rajendra Singh - The Waterman of India (Grades 6-8):*

The inaugural skit unfolded the compelling narrative of Mr. Rajendra Singh, renowned as the waterman of India. Set against the arid backdrop of Rajasthan, the students skillfully portrayed Mr. Rajendra's trials and tribulations in raising awareness about water conservation, weaving a tale of resilience with masterful dialogue and impeccable acting.

- *Rajasthani Dance Performance (Grades 6-8):*
As a fitting conclusion to the first act, a Rajasthani dance sequence seamlessly fused with hip-hop choreography, infusing a celebratory aura into the event.

- *Dashrath Manjhi - The Mountain Man of India (Grades 6-9):*

The second act delved into the life of Dashrath Manjhi, the mountain man of India. Students showcased a gripping tale of perseverance and unwavering determination, where one man, with solitary determination, literally paved the way for a brighter future. The skit seamlessly integrated drama with contemporary dance, leaving an indelible impression.

- *Robinhood Army (Grades 6-AS levels):*
The culminating skit, conducted in Hindi, addressed the critical issue of food wastage. Provoking introspection, the act shed light on the harsh reality of this issue, aiming to raise awareness about hunger relief programs.

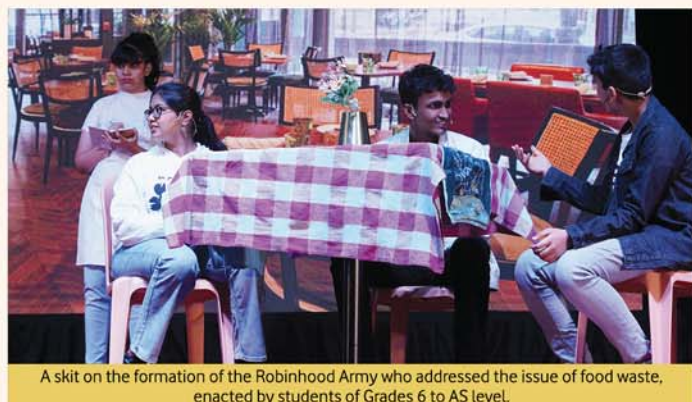

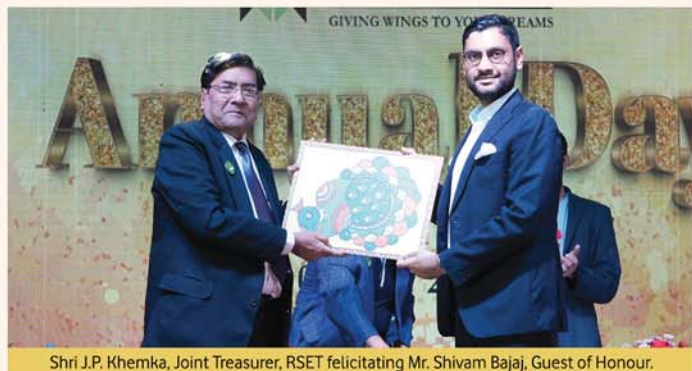

Students portrayed a group of impassioned youth tirelessly working towards the noble goal of zero hunger, thereby bringing joy and happiness to thousands.

The Annual Day Celebrations at Mainadevi Bajaj International School thus was a splendid tapestry of talent, creativity, and social consciousness, leaving the audience both entertained and enlightened. The objective of fostering a sense of community, showcase student talents and commemorate achievements was well brought out at the Annual Day. The Annual Day Celebrations in fact promoted school spirit and teamwork and provided a platform for students to express themselves creatively.

In essence, the Annual Day served as the perfect stage for the exhibition of the acting and dancing prowess of the students from the Pre-Primary and Primary sections. The audience, predominantly comprising parents, couldn't resist showering praise and applause upon each participant.

In doing so, we validated Nik Halik's assertion ,

Foundation Day

Celebrations

Durgadevi Saraf Institute of Management Studies (DSIMS) & Durgadevi Saraf Global Business School (DSGS) are two of the greater milestones in the history of Rajsthani Sammelan Education Trust that has done unmatched service in the field of education in the commercial capital of India. The Business School has been promoted to fulfil the dream of the promoters, who have aspired to provide value-based Management Education that would fulfil the needs of all the stakeholders. It intends to create a culture for academic excellence with emphasis on social sensitivity and a global mindset amongst our students.

To remember the proud history with the community, employees and supporters and

to remind about the humble beginnings of the organisation or an institution, we at DSIMS & DSGS celebrate it as Foundation Day and as the day of academic Inauguration. It is to commemorate the day when our institute was established. The Foundation Day gives us an opportunity to acknowledge some of the tough times we have faced, and the incredible ways we have bonded together as an Institution. Foundation Day is always an exhilarating experience to bring together the whole family of DSIMS & DSGS.

He also mentioned that good leaders also have an appetite to revisit their own assumptions, and unlearn things when needed.

Dr. Sarita Vichore addressed the students, and shared some highlights of the importance of being humble, gracious, and resilient. She also mentioned that the ability to embrace vulnerability, the strength to unlearn, and the ability to stay resilient, are the three important skills that will define leadership in the world going forward. Mr. Ashok Saraf in his message mentioned about hard work, value of time, and the use of modern technology, as critical tools for success. He also spoke how over the past several years, technology has become an essential part of our day-to-day lives, both personal and professional. Technology in the workplace has completely

redefined operational processes as well as consumer behaviors and expectations.

Chief Guest of the event, Dr. R. Ramakrishnan addressed the students and explained about the augmented world. He talked about moving out of our comfort zones; why do so many of us—individually and collectively—fail to experiment and keep our ideas to ourselves, let alone anticipate the massive and disruptive changes that are unfolding. Driven by fast moving technologies and globalization, the pace of change is accelerating, our brains are struggling to keep up, and surprise, discomfort, and unrest are the result. He shared his learnings and experience with the students. A token of appreciation was presented to Dr. R. Ramakrishnan by Mr. Ashok Saraf.

Furthermore, Mr. Uday Wankawala addressed the students and talked about his experiences. He mentioned how new age entrepreneurs are getting aid from the Government to promote new talents. UNLEASH YOUR POTENTIAL

Mrs. Florina Fernandes,

PTA Initiatives - Celebrations of all kinds give us the excitement to keep making it through days that seem purposeless. It allows us to relax and unwind in the midst of busy and crazy lives. We use celebrations as an excuse to gather with the friends and family that mean that most to us. We also enjoy celebrations because they allow us to remember the things in life that truly matter. One such celebration was organised by the members of PTA "Garba Raas 2023" A fun-filled celebration with DJ, Music, Light, food, games, variety of stalls and lots of gifts and surprises. The teachers, students and parents of the Primary Section joined together and rocked the floor. There were prizes for Best Dance and Best Costume for students, parents and teachers. The dandiya night was made grander with the presence of television stars as chief guests.

Joy of Giving - "You don't need money to help others - you need a heart."

PTA members at Radhika Old Age Home

The students realised just this during our collection drive in the Joy of Giving month. Our parents poured their hearts out while the students conducted the drive to collect essential groceries, toiletries, stationery items and more. The goods collected were more than we had expected and these were sufficiently divided between the institutes - IDF, Vimladevi Old Age Home and Shanti Daan. We are grateful to our parents who were limitless in their generosity and the collections were made in just two days.

It's not how much we give but how much we love we put in giving.

"Kindness in words creates confidence. Kindness in thinking creates profoundness. Kindness in giving creates love."

November Kindness Month illuminated our days with a spectrum of benevolent acts. From expressing gratitude to volunteering and spreading random acts of kindness, each day held a unique task, weaving a tapestry of positivity. Social media buzzed with heartening stories, showcasing the collective efforts to make the world a kinder place. The "Kindness Challenge" added a playful touch, urging participants to amplify the ripple effect of compassion. As the month concluded, we hoped that the spirit of intentional kindness would continue to leave an indelible mark on our communities and hearts.

Children's Day and Diwali Celebration 8th November - A unique blend of festivity and joy filled the air as Diwali and Children's Day coincided, transforming schools into a hub of celebration. Embracing a 'No Bag Day' for Diwali, students engaged in vibrant competitions, infusing the day with creativity and enthusiasm. On Children's Day, teachers added an extra touch of warmth by presenting personalized cards to each child along with key chains, fostering a sense of connection. The school echoed with laughter and camaraderie as teachers showcased their dancing talents, creating cherished memories for the little ones. The confluence of these two celebrations made for a memorable day, balancing cultural traditions with the pure joy of childhood.

Diwali spreads the joy of giving and experiencing the joy that others feel. Our grade 9 students organised a SUPW charity fundraiser through a class canteen. The menu preparation, execution and finances were well planned by the students under the guidance of their teachers. The canteen without a doubt was a roaring success and the revenue generated will allow us to help more NGOs during the coming months. They followed the code of sustainability and all the children had to bring empty tiffin boxes, glasses, spoons etc. This helped us to reduce the waste. It was

amazing to watch the pride in their eyes for an event well conducted.

The CSSC Blood Donation and Medical Camp - The Parent body of CSSC along with the Meenatai Thackeray Blood Bank organised a medical health checkup and blood donation camp on the 25th of November for the staff and families of RSET campus. The turnout for the blood donation was phenomenal and many availed of the health check from the panel of 11 doctors at the site. We are grateful to the parents for the overwhelming response and support.

Field Trips

A day out at KidZania - Embarking on a journey of fun and learning, our recent picnic to KidZania was a captivating adventure for both students of senior KG to Grade 3 and teachers. Exploring the interactive city, where kids step into grown-up roles, was an enriching experience. As one student joyfully exclaimed, "Learning has never been this much fun - KidZania is where imagination meets education!"

The students of Grade 9 experienced a 'once in a lifetime opportunity' when they visited **'The Times of India'** printing press at Malad east. What greeted them as they entered the site was the huge printing plant of TOI. In a room

Grade 9 students at the Times of India site at Malad

named Yamuna the students were shown a presentation about the working of the machines and some innovations such as fragranced and 3D newspapers. Students learnt the cost price of a newspaper is Rs. 35 which is compensated by advertisements and brought down below Rs. 8. They mainly use four inks - cyan, magenta, yellow and black. Their machines produce 1 lakh 80 thousand newspapers per hour and have a makeshift for breaking news as well. The students surveyed the printing machines and were impressed with the technology. Altogether the field trip was alluring and informative.

The middle school students went to The Chatrapati Shivaji Vastu Sanghralaya while

grades 3 to 5 visited the Nehru Science Centre.

The students of grade 10 had a campus visit to Flames University at Pune. Along with a tour of the campus they also had such great learning sessions by the faculty. There were sessions on Personality Psychology and information about the admission process. While the students were impressed with the facilities on the campus, they were equally engaged in knowing more about career options open to them.

Christmas is a season not only of rejoicing but of reflection:

Christmas Celebration was held in the Activity hall. The students from grade 6th to 8th enacted a skit on The Nativity, the choir sang the carols in their melodious voices. The joyous season of Christmas is here and therefore to make it even more delightful we had activities like a Christmas fancy dress competition where the students were dressed in creative colourful attire. 7th grade students were mostly dressed in the Christmassy attire. The lobby was beautifully decorated by the hobby club students and teachers. Various activities were organized for our primary students like Card making and Carol singing competition (gr 4 and 5). Students came dressed in Christmas colours (White, Red and Green) and made the Season of Joy even more

joyous, full of love and merriment. The day saw activity-based learning without the assistance of books. The preprimary students had a slumber party at PDSA in the evening, a much awaited event. It was delightful to see the little ones

The Christmas carnival was celebrated from 18th December 2023. It brought along a lot of excitement as the kids enjoyed art and craft time, decorating the Christmas tree, sang carols and Santa songs; had fun trying their hands at making chocolate balls and danced during snowy messy play in the class. We had a Christmas party for them wherein Santa Claus came all dressed up to give away goodies to the kids at MBIP on 22nd December 2023. We had a Christmas break from Monday 25th December 2023 to 1st January 2024.

We are a culture of Festivals.
 A way to celebrate all aspects of Life.
 -Sadguru

Last quarter of the year in India is marked with numerous festivals celebrated across the country educating students with lessons of life whilst bringing in an ambience of fun and frolic. Emotional and Mental health is of utmost importance in today's era and it is being recognized worldwide with 10th October being recognized as the World Mental Health Day.

On October 7th, the Ramdhar Maheshwari Career Counseling Center (RMCC) hosted the **"Strategies for School Counseling in the New Era" workshop on account of World Mental Health Day**. This event was skilfully organized by RMCC, featuring Dr. Avinash Desousa as the keynote speaker. Dr. Desousa, a renowned expert in mental health and education, guided the audience through a captivating exploration of contemporary school counseling strategies.

The workshop drew a diverse and engaged audience of 40 counselors and special educators from nearly 20-plus schools across the city. With the ever-changing educational landscape, the focus on new-era school counseling strategies was timely and crucial. The workshop began with a warm introduction to RMCC and Dr. Avinash Desousa. The first session delved into pressing issues such as **"Vaping and Substance Abuse Concerns" and "Adolescent Sexuality Issues."** Dr. Desousa's dynamic approach brought these topics to life through vivid examples and practical strategies, encouraging active participation from the audience. Attendees shared their experiences and concerns, making it a two-way exchange of knowledge. A fun and interactive trivia session provided a refreshing

break and fostered engagement among participants. The second session delved deeper into "Socio-Emotional Needs of Students" and the challenges of "ADHD and ASD within the School Environment." Dr. Desousa's captivating storytelling and real-life scenarios prompted the audience to ponder, reflect, and even laugh at the complexities of these issues. This practical and relatable approach left a lasting impact, fostering a sense of collective responsibility for students' well-being.

RMCC initiated the Career Development Program (CDP) with students from Durgadevi Saraf Junior College - DSJC (Grade 11) and Ghanshyamdas Saraf College - GSCC (Grade 13).

The Career Development Program (CDP) at GSCC, conducted by a counselor from RMCC for first-year students, has demonstrated notable strides in nurturing the professional growth of participants. The initial assessment phase, held in November, paved the way for a series of enlightening workshops throughout December. These workshops, meticulously addressing interview preparation, communication skills refinement, and the strategic development of LinkedIn profiles, underscored the program's commitment to offering a holistic preparation for students entering the workforce.

The decision to extend the assessment deadline until December 22nd reflects the program's dedication to inclusivity, allowing a more comprehensive participation from students. In addition to these career-centric components, the program took a forward-thinking approach by introducing discussions on overseas education. This addition provided students with valuable insights into the myriad ways RMCC can assist them in navigating diverse career and academic pathways. As the program continues to evolve, these initiatives not only equip students with the necessary skills for their professional journey but

also underscore RMCC's commitment to holistic education and global perspectives.

On December 14th, 2023, Thursday, RMCC conducted a session on **'Anger Management' for the members of the Rotaract club**. This follow-up workshop aimed to build on the initial Anger Management session held in September, 2022. The facilitator revisited key concepts from the previous session, emphasizing the importance of understanding how to compartmentalize anger effectively. The primary goal was to equip students with practical strategies for managing anger in a more constructive and productive manner.

The interactive session encouraged constant student participation, with attendees actively providing their insights and engaging in discussions. Real-life case studies were presented, focusing on situations involving home, college, peers, and self, prompting students to consider how they would react in these scenarios. Following the case studies, the facilitator introduced and elaborated on the techniques of the 3 R's - Recognize, Reflect, and Respond - as effective tools for anger management.

Throughout the workshop, students remained actively involved, and their feedback indicated a desire for such sessions to be conducted twice a year. The engaging and interactive nature of the session contributed to a positive learning experience for the Rotaract club members, fostering a better understanding of anger management principles.

RMCC has been conducting Career assessments for students assisting them in identifying their areas of interest, strength and aptitude to follow their passion for a successful life. Psychometric Career assessment conducted at RMCC assist students in making right Subject/Stream selection allowing them to pursue right program in Undergraduate.

Education Requires a Paradigm Shift in India

Raymond Fernandes
Chief Academic Officer
Singhania Education Services Ltd

In the rapidly evolving landscape of global education, India stands at a crucial juncture where transformation is not just desirable but imperative. The education system in India has long been criticized for its shortcomings, ranging from inadequate infrastructure to outdated pedagogical approaches. Despite efforts towards reform, significant challenges persist, necessitating a paradigm shift to ensure equitable and quality education for all.

Current State of Education in India

Disparities in Access and Quality

India's education system grapples with stark disparities in access and quality across different regions. Rural areas face infrastructural deficiencies, including insufficient school buildings, lack of proper sanitation facilities, and a shortage of trained teachers. According to the Annual Status of Education Report (ASER) published by the NGO Pratham, learning outcomes in rural schools remain subpar, with a large percentage of students lacking foundational skills in reading, writing, and arithmetic.

In urban centres, while infrastructure may be relatively better, overcrowded classrooms and inadequate teacher-student ratios hamper effective learning. Additionally, the emphasis on rote memorization and examination-centric approaches prevails in both rural and urban schools, undermining critical thinking and creativity among students.

Socioeconomic Barriers

Socioeconomic disparities further compound the educational inequities in India. Children from marginalized communities, including scheduled castes, tribes, and economically weaker sections, often face discrimination and lack access to quality education. Moreover, gender disparities persist, particularly in rural areas, where girls are more likely to drop out of school due to factors such as early marriage, household responsibilities, and safety concerns.

Digital Divide

The COVID-19 pandemic exposed the digital divide prevalent in Indian education. While urban and affluent households swiftly transitioned to online learning during lockdowns, many students from rural and low-income backgrounds struggled due to the lack of internet connectivity, access to devices, and digital literacy. This digital chasm widened existing educational disparities, highlighting the urgent need for inclusive and accessible digital infrastructure.

Challenges Faced

In urban areas, rapid urbanization and migration pose challenges for educational infrastructure. Overcrowded classrooms, inadequate facilities, and a shortage of qualified teachers strain the urban education system. Moreover, the pressure to excel in competitive examinations fosters a culture of rote learning and exam-oriented teaching practices, stifling creativity and holistic development.

Rural education faces multifaceted challenges, including inadequate infrastructure, teacher vacancies, and low learning outcomes. The ASER report consistently highlights the learning crisis in rural schools, with a significant percentage of students lacking basic reading and numeracy skills. Additionally, issues such as caste-based discrimination, child labour, and insufficient awareness about the importance of education further hinder educational progress in rural areas.

While metro cities boast better infrastructure and educational opportunities compared to rural areas, they grapple with their own set of challenges. High population density, limited resources, and intense competition for admissions to reputed educational institutions create immense pressure on students. The emphasis on academic performance often overshadows holistic development, contributing to mental health issues and academic stress among students.

Recommendations for Transformation

For the India of today, the imperative for transformation in education is undeniable. The current state of the education system is marred by glaring disparities in access and quality, exacerbated by socioeconomic barriers and the profound impact of the digital age. Recognizing the urgent need for change, a well-planned roadmap for comprehensive transformation is required. From reimagining pedagogical approaches to bridging the digital divide, the

recommendations outlined herein aspire to not only redress existing shortcomings but also cultivate a dynamic learning environment that nurtures the holistic development of every learner. By advocating for bold reforms grounded in principles of equity, innovation, and social justice, these recommendations seek to propel India's education system towards a future where every individual has the opportunity to unlock their full potential and contribute meaningfully to society.

1. Equity-Centric Education

Ensuring equity-centric education in India's K-12 segment is a multifaceted challenge that involves addressing various socio-economic, infrastructural, and systemic barriers. Nevertheless, schools must prioritize equity-centric education that ensure access to quality education for all children. This, in no terms is an easy endeavour. One must consider economic disparities, regional disparities, language barriers, gender disparities, inadequate infrastructure, teacher shortage and quality, access to technology and curriculum relevance to name a few.

Therefore, equity centric education must focus on targeted interventions and school leaders have to prioritize what change they would like to bring about in their institutions.

Despite the long and winding list of considerations the following recommendations can be a good starting point;

1. Improving infrastructure in schools

This does not have to be a complete overhaul but small structured changes and interventions that will bring about a change in the desired direction.

If, for example, you would like to improve the reading skills of your students, you do not have to refurbish the entire library. All you need is a list of new and exciting books that your students would like to read and an enthusiastic teacher who will lead the programme.

2. Recruit and train more teachers

While recruiting a good teacher solves half the problem, the important facet to ensuring equity centric education is to continually engage teachers in professional development and training. The NEP has mandated 50 hours of teacher training and this recommendation must be put in practice by all schools.

3. Provide scholarships and incentives to deserving students.

Extrinsic motivation like recognition of effort and excellence in the form of certificates and

scholarships is a good start to initiating an equity centric education. The larger goal out here must be to ensure that the school culture undergoes a change to provide students with opportunities of autonomy mastery and purpose as recommended by Daniel Pink in his book 'Drive'.

2. Curriculum Reforms

Curriculum reforms are essential to foster critical thinking, creativity, and practical skills among students. A shift from rote memorization to experiential learning approaches, integrating life skills education, and promoting interdisciplinary learning can enhance student engagement and prepare them for the demands of the 21st-century workforce.

The dichotomy here is that our education system is geared to be an exam-centric system and unless we modify our approach to assessments we will not be able to translate curriculum reforms into favourable outcomes.

So let us begin with the end in mind for every grade and every subject. Let us plan key result areas for each student, design achievable outcomes for each child and then provide them opportunities to achieve these outcomes.

Just one, high-stake end of the year pen-and-paper assessment will not cut it out. We must have mini capstone projects, extended case-studies, secondary research as a part of our assessments.

When children focus on the outcome they will focus on their learning and in doing so will prepare themselves of the demands of the 21st century.

3. Digital Inclusion

Efforts to bridge the digital divide must be intensified, particularly in rural and underserved areas. This involves expanding internet connectivity, providing subsidized devices to economically disadvantaged students, and imparting digital literacy training to teachers, students, and parents. Leveraging technology for personalized learning and teacher professional development can also enhance educational outcomes.

Digital inclusion is paramount, if education has to move the needle in the positive direction. The hard truth of education in India is that it is yet largely teacher centric as opposed to student centric. Therefore if we have to include digital intervention in our education systems, teachers must be empowered to accept it first.

This is not difficult, it requires a shift in perspective.

A wonderful way to bring about digital inclusion

is to adopt the SAMR model.

Let us take assessments as an example.

1. Let us **substitute** a few assessment with digital assessments.

The advantage here is that teachers do not have to create the assessments as they are readily available. What is more important is that the teachers do not have to evaluate these assessments.

2. Then **augment** these assessments to increase the outcome.

Get students to attempt the assessment as many times as they would like to so as to score a 100%.

The first two steps bring about the **enhancement** needed to an already existing process. This also provides the time required to accept this change.

The next two steps will bring about a **transformation** in the assessment process.

3. For step 3, we **modify** our assessments policy to include digital assessments.

4. And for the final transformation, redefine assessments in a way that they cannot be done without the use of technology.

Here we can include primary and secondary research to our assessments, capstone projects and case studies.

4. Teacher Training and Support

Developing an effective in-service teacher training program for K-12 educators is essential for fostering continuous professional growth and enhancing student learning outcomes. In today's dynamic educational landscape, teachers require ongoing support and development to navigate evolving pedagogical approaches, incorporate new technologies, and address diverse student needs effectively. Therefore, designing a comprehensive and efficient training program tailored to the specific needs of K-12 educators will go a long way in providing a paradigm shift in education.

Teacher training must follow a structured approach to crafting such a program, emphasizing the importance of needs assessment, goal setting, curriculum development, instructional strategies, resource allocation, and ongoing support.

By conducting a thorough needs assessment, educators can pinpoint areas for improvement and tailor the program accordingly. Clear goals and objectives ensure alignment with broader educational objectives and standards, guiding the development of a curriculum that integrates the latest research and best practices. Incorporating diverse instructional strategies and providing access to resources further

enriches the learning experience for educators, promoting active participation and application in real-world classroom settings.

Moreover, establishing mechanisms for assessment, feedback, and continuous improvement ensures the program remains effective and relevant over time. By adopting a systematic and holistic approach, educational institutions can create sustainable training programs that empower educators to excel in their roles and positively impact student learning outcomes.

5. Community Engagement

'It takes a village to raise a child'

This African proverb has more relevance in today's world that it probably did back in the day. Community engagement in schools is pivotal for fostering a supportive and enriching educational environment.

To achieve this, schools can implement several strategies. First, clear communication channels must be established, including newsletters, social media platforms (wherever possible), and website sections dedicated to keeping the community informed. Parent-Teacher Associations (PTAs) or similar organizations should be encouraged to involve parents in decision-making processes and school events. Volunteer programs can engage community members, utilizing their skills and time for mentoring or tutoring. Community events,

workshops, and seminars can be organized on relevant topics to involve parents and community members in discussions about education and student well-being.

Open houses and parent-teacher conferences provide direct opportunities for engagement between parents and teachers. School advisory councils, partnerships with local businesses and organizations, and student-led initiatives further enhance community involvement. Utilizing technology platforms and establishing feedback mechanisms ensure continuous communication and improvement of community engagement strategies. Recognizing and appreciating community contributions also fosters a culture of collaboration.

Building strong partnerships with local communities, parents, and extended families is essential for driving sustainable change in education. Engaging parents and community members in school governance, awareness campaigns, and collaborative initiatives can create a conducive learning environment and ensure the holistic development, not only of students but for all stakeholders.

Conclusion

The challenges plaguing India's education system are multifaceted and require a comprehensive, multi-stakeholder approach for effective transformation. By prioritizing equity, embracing innovative pedagogies, leveraging

technology, and investing in teacher capacity building, India can pave the way for an inclusive and equitable education system that empowers every child to realize their full potential.

Present Organisation and Designation: Manager - Product Category & Community Marketing at Fast & Up

Memorable Events/ Journey in the Institution:

As you gear up to start on this amazing experience at Ghanshyamdas Saraf College, remember that the courses you take, the friends you make, and most of all, the perspective you carry, can change your world. Commit to expand, care to understand, converse to grow. I remember when I was entering my first year of college, I was extremely excited but at the same time nervous. Reflecting back on the whole experience now, I would encourage incoming students to recognise that like anything in life, you'll face both ups and downs throughout your college experience. The important thing to remember is to always try your best and not let the instances where you may have fallen short hold you back from continuing to work hard and reach your full potential. Speaking more specifically about my college, it is a massively rich campus with both great faculty and amazing opportunities. Lastly, you can't paint the picture of your life with your hands in your pocket so remember to take risks to grow yourself further. The opportunities are ample. Seize them!

Memorable Events/ Journey in the Institution:

MBIS was one of the few schools I had shortlisted when I decided that I wanted to do IB. I can only be grateful that I decided to go here. I only spent 2 years of my life at this institution but it still feels like home. It gave me teachers who are like friends and friends who are now family. It focused on all round development rather than just academics which I feel is important and healthy. I've made countless memories here but 'the bake sale' will always be an experience that stands out. More than half of our class came over to my place and we decided to make chocolate discs and chocolate mousse just a night before. The havoc it caused can only be laughed upon. We sold the desserts the next day in school and then donated all the money to an animal shelter. All of us were touched by the entire event. This was also one of our CAS projects. A special shout-out to Pronami Khan for organizing and helping us execute the whole project. I'd like to thank our dear Pinki ma'am for making Business Management an amazing and interesting subject which also motivated me to pursue a degree in it. When I look back I can only feel lucky to have gone to MBIS and I'm sure every alumni feels the same.

Our Gratitude to the Large Donors of Rajasthani Sammelan Education Trust

Rajasthani Sammelan Education Trust today is a reputed name in the field of education with multiple educational institutions offering education from Nursery to post graduate studies in management and media studies. **Approximately 16,000 students** study across various schools and colleges located in the state-of-the-art RSET campus in Malad (Mumbai).

This transformation and growth of RSET has been brought about by some of the visionaries who were associated with the Trust since 1948 and had the far sightedness to empower the community through education. What started as a single school for the girl child way back in 1950's today has metamorphosed to multiple educational institutions and students.

RSET owes its gratitude to the benevolence of its **Large Donor families** who had the vision to invest for the cause of education way back in the early years and have continued to do it over the years, knowing fully well that **investment in knowledge pays the best interest**. And rightly so. From time to time all our **Large Donor families** who have been associated with RSET have seen their investment in education come to fruition and we are reaping the fruits of their vision through the various institutes and the infrastructural facilities that have been built at RSET some of which have been named as per the desire of our esteemed Donors and membership as per RSET rules were given as per the membership rules prevailing at that time.

All our Donor Trustees, Office Bearers and Managing Committee Members bring with them an extensive experience and knowledge of running their successful enterprises. It is largely due to their efforts, vision and commitment that RSET has grown in the size and stature. Our gratitude to all our Members for joining with us in our educational endeavours.

Thank you Donors

Our family of donors include illustrious business families, individuals, corporate partners, foundations and all those people who are committed to our philosophy of providing "Quality Education for All" and have been coming forward with their contribution from time to time to create an institution of educational excellence.

Through these columns, we thank and acknowledge the support of our donors for their generous contribution over the years. Your support and contribution plays an important role in helping Rajasthani Sammelan to achieve its mission of developing a community dedicated to achieving national and international levels of excellence in various fields of education.

Your generosity has significantly contributed and helped the students in various areas. Every donation that you make impacts the life of our students in some way or the other. Your contribution has helped us build various institutes of excellence with the best infrastructure that include state of the art computer labs, knowledge resource centre, communication centre, health centre, educational outlet, sports facilities and scholarships instituted for meritorious students. All our institutes have benefitted immensely from your support.

Undoubtedly, you as our esteemed donors have made Rajasthani Sammelan stand tall in stature and have helped it grow from time to time. Like you, there have been many others whose contribution to Rajasthani Sammelan way back in the early 1950s has been significant and notable. And we gratefully acknowledge their noteworthy contribution in setting up the edifice of this great institution.

We gratefully acknowledge the contribution made by Late Shri Kudilalji Seksaria who donated the land on which the current structure of Rajasthani Sammelan stands. This contribution cannot be valued in terms of money, and it would only undermine his contribution if we were to measure this in monetary terms.

At the same time, had it not been for the significant contribution of Rs. 50,000/- by Shri Brijmohan Ruia (Brijmohan Laxminarayan Ruia Charity Trust) way back around the year 1950, the landmark Sarvodaya Balika Vidyalaya would not have come up. A small dream way back in early 1950s has today paved the way for a number of institutions under the banner of Rajasthani Sammelan. As they say, "It all begins with a Dream".

We are proud to have you all as an integral part of the positive impact and an enduring legacy that we are creating at Rajasthani Sammelan. May your benevolence continue to bring about the change we wish to see in our educational system. We stand committed to spread our wings and fly higher. In this journey of growth, we seek your continued support.

We constantly endeavour to maintain accuracy in the list of donors and we thank you for the feedback in case of any discrepancy that has been noted. Should there be any errors or omissions in this list, we urge you to contact our Donations Officer on rs@rajasthani.org.in
